

# SARACEN 6000 3 Hook 2 Roller

multi-point door lock

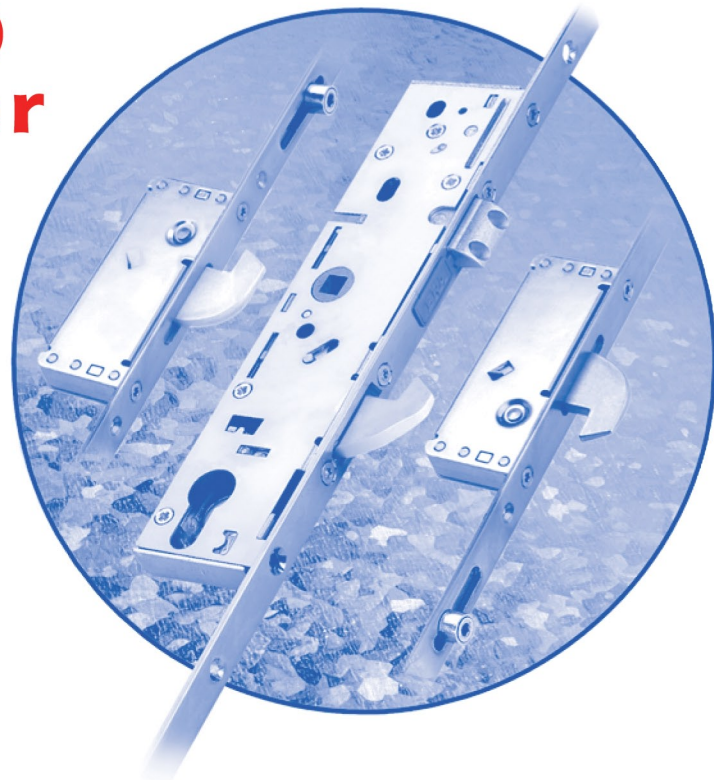

**The lock has 3 hooks and 2 roller cams for enhanced performance and weather sealing.**

The rollers ensure precise compression of the weather seal and door alignment in the frame, while the hooks offer extra security.

The bi-directional hooks ensure maximum resistance to anti-lift and separation providing a secure barrier against forced entry.

The central gearbox, available in two backsets, has a robust central hook with a snib facility on the reversible sash (latch) bolt. A split spindle option allows for back or front door operation on the same lock.

Complementary door furniture, cylinders, letterplates and hinges available.
